PROFESSIONAL PROFILE

Network and Cybersecurity Engineer with more than three years of experience in **software development and data analysis**. I use SQL, Python, and dashboards to turn data into insights that support decisions. **I create AI agents tailored to each client's needs**, connecting APIs and databases to automate processes. My cybersecurity background guides the **responsible handling and protection of information**.

PROFESSIONAL EXPERIENCE

Freelance Developer

September 2026 - Present - Remote

Tailored solutions from requirements through production. I design AI agents around each client's needs and workflows, working directly with clients remotely.

- Build websites and web applications, as well as Python-based solutions.
- Analyze data and create dashboards and strategic reports.
- Design AI agents with the OpenAI API, tailored to client goals and connected to APIs, external services, and SQL databases.
- Integrate AI into existing products and build workflows to query and process information from other systems.
- Automate processes with RPA and AI to reduce manual work and operational effort.

Web Developer and Data Management

February 2024 - September 2026 - Mexico City

Data analysis for the insurance sector, web development, and database management. I turn information into insights that support decisions while handling it responsibly.

- Design and build websites and internal tools with C# and Python.
- Maintain relational databases responsibly; create SQL Server views and optimize SQL queries.
- Analyze information with Python, Pandas, NumPy, and Excel; build Power BI dashboards and generate insights.
- Run ETL and source integration processes; develop and optimize Telerik reports.
- Integrate AI agents and automate processes using RPA.

Software Developer

January 2023 - October 2023 - Toluca

Worked on domestic and international sales systems, addressing requirements, maintaining applications, and managing information.

- Gather and document functional requirements with key users.
- Diagnose and fix defects, maintain systems, and update catalogs.
- Manage information and supplier databases.
- Build and consume web services to connect systems.

Xajid Martínez - Technical Profile

SKILLS

Data Analysis - SQL · Power BI · Python · Pandas · NumPy · Matplotlib · Advanced Excel · ETL · Data Management · Data Visualization

AI Agents and Automation - OpenAI API · AI Agents · Custom AI Agent Design · AI Integration · AI Automation · API Integration · SQL Integration · Process Automation · RPA · UiPath · Intelligent Workflows

Software Development - Python · C# · JavaScript · Java · Angular · Spring Data · MVC · REST APIs · WebServices · Git · Web Development · Enterprise Systems

Databases - SQL Server · Oracle · MySQL · SQL Developer

Cybersecurity and Information Protection - Linux · Windows Server · Network Infrastructure · Information Security · Pentesting · Ethical Hacking · Cybersecurity · Information Protection

PROJECTS AND COLLABORATIONS

Process Automation - FLECHISA - Contributed to five automation robots for a distribution and logistics company.

Web Development - THB - Collaborated with SAO on the THB website in the insurance sector.

Recipe App with API Integration - Web app that uses APIs to retrieve and display recipe information. [View demo](#)

Login and Temporary Database - Demo web project with a login flow and temporary database. [View demo](#)

EDUCATION

Engineering Degree in Networks and Cybersecurity - Graduated

August 2020 - December 2025

Information Technology Technician

August 2020 - April 2023 - Universidad Tecnológica del Valle de Toluca - Higher University Technician - Digital Network Infrastructure

COURSES AND ADDITIONAL TRAINING

- Information Security and Penetration Testing - 2025
- Ethical Hacking and Cybersecurity - 2025
- Ethical Hacking - 2024
- CCNAv7: Enterprise Networking, Security, and Automation - 2023
- Digital Forensics - 2019
- Hacking with Python

LANGUAGES AND AVAILABILITY

Spanish: Native · English: B1 - Intermediate

Primarily interested in Mexico City and the metropolitan area. Open to opportunities elsewhere. Available for remote, hybrid, and on-site roles.
